

Jacobsen

Jacobsen's new HR700™ is the world's first and only wide area rotary mower with a 14-foot width-of-cut to increase productivity by up to 25% (up to 2.5 acres/hour more) over traditional 11-foot mowers. With ultra-durable new SureStrength™ decks and superior maneuverability, the HR700 is the ideal mower for sports fields, parks, and commercial grounds. The new AdaptiCut™ system automatically adjusts mow speed to ensure consistent performance even through the thickest grass.

The HR700 is part of Jacobsen's new HR Series of wide area rotary mowers. Learn more about the HR700 at www.jacobsen.com/hr700.

John Deere

MICHELIN® X® TWEEL® TURF™

The MICHELIN® X® TWEEL® TURF™ is an airless radial tire sold exclusively for John Deere ZTrak 900 Series models with 54-, 60- and 72-inch deck sizes. Unlike traditional pneumatic tires, the MICHELIN XTWEEL TURF virtually eliminates tire downtime and is nearly maintenance-free. Landscape professionals can experience greater performance, increased uptime and a lower cost of ownership with the MICHELIN XTWEEL TURF. It offers uniform cut quality, enhanced operator comfort and increased productivity. Because the MICHELIN XTWEEL TURF is an airless radial tire, it minimizes the cost and time spent on repairs and maintenance.

The MICHELIN XTWEEL TURF has the same dimensions and bolt pattern as a standard 24x12x12 tire, and features automotive rubber technology, allowing the tread to last up to three times longer than standard turf tires. Those attending GIE+EXPO 2016 can view the MICHELIN XTWEEL TURF on the John Deere Z930M along with the rest of John Deere's line of commercial mowing equipment at booth #1110.
