

Walker Mower

Walker H38i - The Most Powerful Walker Ever

The H38i is a perfect addition to the proven Model H family of high-production mowers. It is the most powerful Walker Mower ever, featuring 38 horsepower, Kohler Delphi® fuel injection and impressive load response. This results in a perfect balance of power to operate all of the biggest Walker decks and attachments, including the new 64-inch rear discharge deck. It also features a redesigned rear axle for superior handling at high speeds on rough ground. This, along with a four-way adjustable Grammer suspension seat, provides personalized comfort keeping you productive on long days.
