

Bobcat

Next revolutionary next generation R-Series excavators from Bobcat Co. feature a bold, distinct design geared toward increasing operator productivity and comfort, as well as machine uptime protection. Landscapers will benefit from a 15 percent increase in over-the-side stability with the new dual-flange track roller system allowing to place larger rocks. Also, an optimized integrated rear counterweight design further enhances the machine's stability.

Strengthened hinges and latches, and more ridged, aligned R-Series excavator panels reduce vibration in the cab, making for a more enjoyable work day. Along with having the largest cab openings in the industry, Bobcat has redesigned its R-Series excavator cab for an unbeatable operator experience. There is 29 percent more floor space and 15 percent more glass surface area, which includes an improved top window and narrower side pillars for visibility that's never been better.

R-Series excavators also feature blades with increased downward angles for greater stability when digging on an uneven surface or trenching at an angle, and a boom swing greaseless pin joint for enhanced uptime protection.

The first R-Series excavators launched include the Bobcat® E32 and E35 in the popular 3- to 4-ton size class. Additional R-Series excavators from Bobcat will be introduced at a later date.

Briggs & Stratton Commercial Power

Commercial Engines that Define Productivity

Vanguard engines are defining what it means to be productive day in and day out for landscape contractors who have no time for engine downtime. Vanguard engines place a premium on combining technology, durability and unmatched support to handle whatever lawn conditions a contractor's crew is faced with — from thick, wet grass to the dusty, debris-filled dry lawns of mid-summer.

The complete line of Vanguard engines is designed with productivity in mind. Easier maintenance, 24-hour parts delivery and innovations like Vanguard EFI and Oil Guard combine to provide unmatched performance and efficiency. With a service and support network focused on commercial equipment and a global 3 year limited commercial warranty, Vanguard delivers the power to get more done — every day. Visit www.vanguardengines.com to learn more.
