

Cub Cadet

Hydro Walk Professional Mower

Minimize maintenance and maximize performance with the new Cub Cadet® Hydro Walk professional mower. Tested and retested in the field by commercial landscapers, this mower has been put through its paces and is ready for business.

Its Easy-Trac Steering Technology comes equipped with hand-lever controls, single-lever cruise control and straight-line adjustable tracking for added confidence and stability on hillsides and slopes. The fixed-floating-deck design follows the contours of the grass for a precise, professional-looking cut. The highly durable Hydro Walk features the strongest beam, control center and yokes in the industry, along with higher clearance and superior weight balance to maneuver over curbs when moving forward or in reverse.

Maintenance-free spindles with sealed single-row ball bearings and easy access to main service points deliver peak performance with limited downtime. And you can mow at your own pace, based on landscape conditions with zero- to 7-miles-per-hour speed control.

The new Cub Cadet® Hydro Walk professional mower helps you withstand the most demanding commercial environments while delivering a precise cut, regardless of terrain. Models will be available in local Cub Cadet dealerships in early 2018. Explore the full Cub Cadet product lineup at cubcadet.com/pro.

Dow AgroSciences

Gallery

Lawn care professionals trust Gallery® specialty herbicide to help reduce callbacks and minimize costly hand-weeding. Gallery provides excellent plant tolerance and long-lasting preemergence control of more than 95 species of broadleaf weeds, including clover, dandelion, oxalis and spurge. It is known for season-long weed control with best-in-class turf and ornamental safety. When used according to label directions, Gallery can be used on all established grasses and can be applied to more than 700 labeled landscape ornamentals. Gallery SC, the new liquid formulation, is easy to pour and mix. It comes in two convenient package sizes — 1-quart and 2-gallon — and the 2-gallon packaging greatly reduces rinsing and disposal. Gallery can also be tank-mixed and applied with Dimension® specialty herbicide to knock out broadleaf and grassy weeds in turf and landscapes.
