Husqvarna expands commercial mower lineup with new stand-on V500 series

Rounding out the company's commercial mower portfolio, Husqvarna adds a stand-on mower series in 2018. Designed for commercial-grade lawn care, the Husqvarna V500 series combines extreme efficiency and durability with a compact design for excellent maneuverability. Set for release in early 2018, the two V500 models will come with zero-turn capability, and the ergonomic body cushion will provide maximum operator comfort. Providing rapid mount-dismount, unbeatable maneuvering and ergonomic operation, operators get the best of zero-turn and commercial walk-behind combined. Backed by Husqvarna's industry-leading 5-year limited commercial warranty, the V500's heavy-duty construction combined with industrial strength drive systems deliver long-lasting operation in any commercial application. Available with a 48" or 54" Commercial ClearCut deck, the V500 models provide excellent grass cutting and management. For fast, convenient access and service, the V500 models are equipped with tool-less tracking adjustment and removable deck covers, easy-to-reach transmission by-pass and front-mounted hydro tanks and pumps. Other additions include a digital color fuel gauge that will let the operator get a quick overview of fuel levels.

CIVITAS WEEDfree BRAND™ Concentrate – The First Hybrid Selective Herbicide

Increase your landscape project's appeal by complementing it with a perfectly manicured lawn. CIVITAS WEEDfree BRAND Concentrate is an environmentally focused herbicide that will maintain the integrity of your customers' turf while enhancing your design. Who says you can't have the best of both worlds?

Get aesthetics and efficacy with CIVITAS WEEDfree BRAND Concentrate.

Hybrid Selective Herbicide. Patent-Pending Microtechnology[†]: Delivery system penetrates formula deeper into the plant, killing over 60 listed broadleaf weeds[‡] with less active ingredients. Efficacy. Fast acting: Weeds show visible injury only hours after application.

Less Actives. Do more with less: Uses 75% less active ingredients[^] than traditional three-way mix herbicides.

Temporary White Emulsion. Maximizes resources: Identify where product is sprayed, reduce over-spraying and call-backs, ultimately saving time and money.

No Offensive Odor. Discreet application: Key benefit for applicator, staff and homeowner.

Whether it's a playground, campus, business park or retail space, protect your design and encourage landscape professionals to secure sustainable success with CIVITAS WEEDfree BRAND Concentrate. To learn more, visit civitaslawn.com.

*When compared to other pesticides containing using these active ingredients.

‡ See back label for listed weeds and control details.

† Microtechnology signifies white emulsion particles less than 1 micron.

**Trademark of Suncor Energy Inc. Used under license.
