

Kubota

Kubota ZD1500 Zero-Turn Mower

The star of Kubota's popular ZD Series is the ZD1500 zero-turn mower, featuring a wide mower deck and a Tier 4-compliant 30.8 horsepower Kubota diesel engine with a Diesel Particulate Filter (DPF) for stand-out power. The entire ZD Series includes three model options: a side-discharge 72-inch mower, a rear-discharge 72-inch mower and a rear-discharge 60-inch mower, all powered by a Tier 4-compliant Kubota diesel engine. Kubota's patented innovative Aerodynamic Cutting System provides for smoother airflow and a more powerful blade rotation resulting in less clumping of clippings, better fuel efficiency and faster cutting performance. The Kubota ZD1500 mower is the most powerful of Kubota's ZD Series and, along with the entire highly coveted ZD Series, is built in the U.S. The ZD Series delivers high-volume cutting efficiency and professional performance for large turf acreages, from residential estate owners to schools and municipalities. All told, the ZD1500 offers unsurpassed levels of comfort, convenience and performance while remaining true to the ZD Series' no-nonsense, workhorse nature.

LandOpt

Esther T Photography

LandOpt's proven systems and processes help our Network Contractors improve in ALL areas of their business – Sales, Operations, Human Resources and Business Management. The result? Our Contractors record average annual revenue growth of 15%, with net profits more than three times the industry average despite outside influences, like weather or the economy.

On-site coaching ensures that our Contractors are achieving their strategic and financial goals, while our continuing education curriculum allows each Contractor's team members to develop and hone his or her skills.

Each Powered by LandOpt Contractor knows that his or her competitive advantage lies in being part of a unique network of green industry professionals who are among the very best in their local markets. Nowhere else in our industry will you find a group of like-minded professionals who can come together to share best practices, ideas and advice as openly and freely as LandOpt Contractors.

“ Since becoming Powered by LandOpt, my maintenance base has doubled. And now, I not only have a solid growth plan in place, but the means by which to make it happen.”
