

## LebanonTurf

Thicker, Stronger, Healthier Turf...Faster

Now with an improved formula, PennMulch Seed Accelerator is the only seed establishment product containing patented Moisture Cell Technology. Comprised of super-absorbent polymers, Moisture Cell Technology can absorb up to 400 percent its weight in water, which causes the pellets to expand and absorb water. As the seed bed dries, the microscopic polymer crystals release water back into the soil, providing the new seedlings with the moisture they need to grow healthy and strong.

Now with Tackifier

PennMulch improved formula now comes with Hydrobond™ tackifier to hold seed, soil and mulch in place. Rest assured that your seeds will stay where planted.

Eliminates Weed Problems

Straw and hay often contain perennial grass weeds like Orchard grass and Timothy that cannot be selectively controlled once new turf is established. PennMulch Seed Accelerator contains no weed seeds. Don't waste your time, labor and premium seed only to have it ruined by weeds.

Cost-effective

It's estimated that up to 30% of the cost of seeding jobs is associated with returning time and again to fix areas that don't fill-in properly. PennMulch Seed Accelerator can't guarantee that your customers will water, but it is proven to speed up seedling establishment. PennMulch greatly reduces the chance of seedling failures.

LebanonTurf produces fertilizer, grass seed and seed establishment, and biological products that help golf superintendents, lawn car operators, professional landscapers and sports turf managers create and maintain healthy turf conditions.

## Nufarm

**Celero®**

Celero® Herbicide from Nufarm is a selective, post-emergence herbicide for control of sedges, including kyllinga, in established residential and commercial turfgrasses, golf courses and sod farms. Imazosulfuron, the active ingredient in Celero, is a systemic sulfonylurea herbicide that translocates down to the roots to deliver superior sedge control. Labeled for both broadcast and spot treatment in cool- and warm-season turf, Celero is the go-to solution for difficult-to-manage sedges.

Celero is a registered trademark of Valent U.S.A. LLC

“ This spring Jamie [Heydinger] introduced me to Celero.

The newest weapon against sedges. I have been using Last Call and Celero together all summer and both have exceeded my expectations. Can't say enough about these two wonderful products. Looking forward to the next great product from Nufarm.”
