

PermaGreen

PermaGreen™ Triumph Spreader Sprayer

The PermaGreen™ Triumph is the industry gold standard of spreader sprayers and is designed to treat nearly every property size. It treats 3,650 square feet per minute (an acre in 15 minutes).

Features

- 150-Lb. 3-hole hopper w/ remote edging
- 12-Gallon (1-Acre) tank capacity
- Fits through 36" gate
- Automatic pressure regulation based on fixed ground speeds
- Drop-down handles
- All stainless frame
- 60-day moneyback guarantee
- 15-month bumper-to-bumper warranty
- 24-month warranty against corrosion failure

RECHARGE™ Sprayer for LESCO® spreaders

The RECHARGE™ Sprayer for LESCO® brand spreaders eliminates the costly second trip across your accounts by providing 8,500 square feet of liquid coverage while leaving room in your hopper for a bag of dry product.

- Well-balanced, low-profile 2.25-Gallon tank
- Low-drift spray nozzle provides a 9-foot pattern
- Battery lasts for 100,000 ft² of application
- Spray gun included for trimming
- Spray switch can be mounted on either handle
- Custom hopper cover included
- Entire kit comes completely assembled and ready to install

Propane Education & Research Council

Propane Commercial Landscape Equipment

Propane saves major time with on-site refueling. Once a cylinder is empty, crew members simply replace it with a full cylinder from the truck, and get back to work. Crews around the country — like Trump Lawn & Land — are discovering that the time-saving refueling of propane mowers has a direct impact on the bottom line. Propane mower cylinders also prevent fuel spillage with a secure fuel system.

“ Our two-man crews are saving approximately 30 minutes every day when they are switching cylinders at the shop versus going to a gas station. We are more efficient, we're saving time, which equals dollars into our pockets. We want to strive to be a sustainable company; going propane was one way of doing that for us. When we made the decision to go propane, we wanted to go all-in propane. We switch our mowers every three years. We're on our second fleet of propane mowers, and plan to continue in the future.”
